

NATIONAL STOP THE BLEED DAY

The top cause of preventable death in trauma is bleeding.

20% of people who have died from traumatic injuries could have survived with quick bleeding control. “**Stop the Bleed**” is a national campaign to address the most common cause of preventable trauma death in the nation: uncontrolled bleeding.

Join museum educators for a demonstration on hemorrhage control to include use of blood-clotting bandages and tourniquets. And learn about the history of tourniquets since the Civil War.

Request ADA accommodations five business days in advance at (301) 319-3303.

SUNDAY
MARCH 31
10 A.M.-12 P.M.
